wystawiła Panu Hong Quan Dau ocenę śródkresową: **pozytywną / ~~negatywną~~**.*

Uzasadnienie oceny

Based on the documents submitted by the student (in particular the report on the implementation of the individual research plan and the supervisor's opinion on the progress in the implementation of this plan) as well as on his personal explanations given during an interview, the commission decided to accept a positive mid-term evaluation. A quite thorough implementation of the assumed plan, with only minor deviations, has been noticed both in meeting the deadlines and in achieving planned results. The correctness of the research and its quality are proven by two scientific articles (one accepted and one submitted) one of which is strongly related to the project. A good cooperation of the student with his supervisor has been acknowledged. All this justifies a positive assessment of the so far implementation of the research plan. The commission is convinced that a full implementation of the subsequent stages of the research plan is possible. Further publications and submission of the doctoral dissertation are expected on time.

Wskazanie pożądaných zmian w IPB

The so far implementation of the research plan allows us to assume that the plan itself has been well prepared and that there is no need to introduce any changes. The only suggestion is that the scientific internship, planned for the 6th semester, should be realized in a place where the student can discuss his problems concerning applications of his results.
